

**Student Learning Outcome #1:** All students demonstrate knowledge reflective of their discipline.

*All students in the program will be able to identify and obtain information from accurate, current and relevant data resources; and analyze and present data pertaining to health status of individuals and populations.*

**Student Learning Outcome #2:** All students will demonstrate competence in the skills needed to apply the knowledge within a professional setting.

*All students will participate in a capstone opportunity to link theory with practice (which includes all seven competencies of a health educator as stated by NCHEC, Inc.) through an on-site internship experience. The internship experience will be evaluated by the instructor with input from the on-site supervisor.*

**Student Learning Outcome #3:** All students use the principles of health literacy in their professional role.

*All students will demonstrate success in various educational experiences offered in specific core courses for students to develop the skills necessary to function as an entry-level health educator based on the seven responsibility areas outlined by NCHEC, Inc.*

**Student Learning Outcome #4:** All students will learn and use the principles of information literacy in their professional role.

*All students will demonstrate success in various educational experiences offered in specific core courses for students to develop the skills necessary to identify and utilize current, accurate, and relevant informational resources that serve public health and public health professionals.*

**Student Learning Outcome #5:** All students develop competence with technology useful for learning and communication relevant to their discipline.

*All students in the program will be able to utilize electronic tools for data collection, questionnaire development, and data analysis.*

*All students in the program will be able to utilize electronic tools for development of communication products relevant to public health.*
