WEST CHESTER  
UNIVERSITY

The mission of the Department of Nutrition in the College of Health Sciences at West Chester University is to shape tomorrow's nutrition and dietetics professionals and leaders through quality, relevant, and innovative teaching, service, and scholarship.

### WHY STUDY NUTRITION?

Do you like to help and interact with people? Would you enjoy learning about the intersection of diet, wellness, health, and nutrition? Would you enjoy helping individuals achieve healthy lifestyle goals? If you answered 'yes' to any of these questions, then a career in nutrition might be for you.

### WHY CHOOSE A NUTRITION DEGREE FROM WEST CHESTER UNIVERSITY?

- We have been providing a quality, accredited undergraduate dietetics program since 1997, and have prepared thousands of students to become nutrition and dietetics professionals.
- Our faculty members conduct **specialized research**, are respected in their fields of expertise at both state and national levels and share their expertise with our nutrition students.
- Our faculty utilize a variety of **inclusive teaching practices**, methods, and strategies in all courses, including problem-based learning, experiential learning, case studies, service-learning, laboratories, interprofessional education, simulation, and immersive learning.
- Our students **enjoy opportunities** for faculty-student research, networking opportunities with individuals both inside and outside of the university, membership and leadership opportunities in a variety of nutrition clubs on campus and professional dietetics organizations, and access to a state-of-the-art food laboratory, and a simulation laboratory with the most up-to-date equipment.
- Our dietetics program offers an **accelerated BS to MSCN program** in which qualified senior-level students can complete up to four graduate courses in our master's in science community nutrition program (MSCN) while still enrolled as an undergraduate student and at the undergraduate tuition rate – a real cost-saving benefit!
- Our dietetics students are eligible for **WCU internal early admission** to our WCU Dietetic Internship.
- Our faculty members pride themselves on providing empathy, warmth and care to **guide our nutrition students to success!**

### BACHELOR OF SCIENCE IN NUTRITION

The Bachelor of Science in Nutrition degree from West Chester University offers students flexibility in career paths within the field of nutrition by offering two concentrations: Didactic Program in Dietetics and Lifestyle Nutrition.

All Bachelor of Science in Nutrition students take four core science and eight nutrition courses. Students choose one of the following concentrations within the Bachelor of Science in Nutrition degree:

### DIDACTIC PROGRAM IN DIETETICS (DPD)

The DPD concentration is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND). Students who complete this concentration meet the didactic requirements of ACEND and are eligible to sit for the registration exam to become a dietetic technician (NDTR). After students complete a Master's degree and an ACEND-accredited supervised practice program (i.e. dietetic internship), they are eligible to sit for the registration exam to become a registered dietitian-nutritionist (RDN).

**Students in this concentration take ten additional nutrition courses and have 15 credits of electives.**

A career in dietetics includes the practice of medical nutrition therapy, community nutrition, or foodservice management. Areas of employment in dietetics include hospitals, clinics, healthcare facilities, sports nutrition, corporate wellness programs, child nutrition programs, food and nutrition-related businesses and industries, public health departments, research institutions, hospitality venues, government institutions, private practice, and academic settings, to name a few.

Students who complete the DPD have also gone on to pursue physician assistant programs, medical school, and accelerated nursing programs.

### LIFESTYLE NUTRITION

The Lifestyle Nutrition concentration combines nutrition with business, management, and exercise science. Students learn best practices for promoting healthy lifestyles to diverse individuals and groups for positions in non-profit organizations, fitness centers, government health agencies, and health-related businesses. Some students may pursue certification as a health coach or personal trainer with outside agencies.

**Students in this concentration take five additional nutrition courses, two exercise science course, two business & marketing courses and have 18 credits of electives.**

Students who complete the Lifestyle Nutrition concentration will be trained as leaders and advocates for organizations that promote health and wellness in institutional settings, small businesses and the community. Graduates will be skilled to work as a nutrition educator, nutrition/wellness coach, weight loss counselor, and a health program coordinator in settings such as: fitness/wellness industry, private practice, health care, government agencies, public relations, and community health organizations.

Students who complete the Lifestyle Nutrition concentration have also gone on to pursue accelerated nursing programs, exercise science programs, and integrative medicine programs.

### NUTRITION MINOR

The Nutrition Minor is designed to impart fundamental nutrition knowledge and an interdisciplinary understanding of the relationship among nutrition, health, physical fitness, and well-being. This 18-credit minor includes two required foundational courses (NTD303 Introductory Principles of Human Nutrition and NTD309 Nutrition Throughout the Lifecycle) as well as four nutrition elective courses that cover a broad range of topics.

### GRADUATE DEGREE – MASTER OF SCIENCE IN COMMUNITY NUTRITION (MSCN)

The MS in Community Nutrition is a research-focused program for those seeking an advanced degree in community nutrition. The MSCN promotes nutritional health and disease prevention in communities with an emphasis on vulnerable populations. The curriculum (33 credits) is offered in an online format and includes courses representing nutrition science, applied nutrition, and research techniques. The program culminates with a capstone paper.

### ACCELERATED BS TO MSCN PROGRAM

The MSCN is also offered as an Accelerated BS to MSCN program. Students must complete a minimum of 90 credit hours and maintain a GPA of 3.0 or higher. They are then invited to apply to the accelerated BS to MSCN program. The accelerated program allows accepted students to take up to four courses during their final year in the Nutrition and Dietetics BS concentration. These courses will satisfy four undergraduate electives in addition to counting as four graduate courses. As a money-saving benefit, these credits are priced at the undergraduate cost per credit.

### DIETETIC INTERNSHIP

The Department of Nutrition in the College of Health Sciences of West Chester University offers one full-time, distance Dietetic Internship (DI) program with two tracks: 1) MSCN DI Track and 2) Post-Masters DI Certificate

WCU undergraduate dietetics students who have completed a minimum of 60 credit hours and who have earned a GPA of 3.0 or higher, may apply for WCU DI internal early admission.

Interns complete over 1000 hours of supervised practice divided into four rotations: Community Nutrition, Food Systems Management, Clinical I, and Clinical II. Upon successful completion of the DI program, students are eligible to take the National Registration Examination for Dietitians.
